QUENTIN SANDER
Solo Founder & Full-Stack AI Engineer
quentinsander@icloud.com | 269-993-9451 | Michigan (Remote) | GitHub: https://github.com/QuentinSander-dev | Portfolio: listingstageai.com

SUMMARY

Self-taught full-stack engineer and solo founder. Spent the last several years shipping production AI systems, agent infrastructure, and SaaS products end-to-end — design, build, deploy, customers. Python, TypeScript, modern AI tooling (MCP, Claude SDK, multi-agent orchestration), and the infrastructure around them.

EXPERIENCE

LLC – Solo Technical Founder – Michigan
2020 – Present

- Design, build, deploy, and operate SaaS and AI products end-to-end.
- AWS Bedrock deployments for private inference. Direct customer work across real estate, wedding planning, and community/nonprofit verticals.

Local businesses – Freelance Web Developer – Michigan
2021 – Present

- Front-end and full-stack builds for small businesses. WordPress, HubSpot, Shopify Online Store 2.0 themes, custom landing pages, basic SEO.

SKILLS

Backend & Languages: Python, Node.js, TypeScript, REST APIs, OAuth 2.1, PostgreSQL, MySQL

Frontend & Frameworks: React, Next.js, React Native (Expo), Tailwind CSS, HTML5, CSS3, JavaScript

Cloud & Infrastructure: AWS (Bedrock, EC2, S3), Docker, Linux VPS, CI/CD pipelines, Vercel

AI & Machine Learning: Claude SDK, multi-agent orchestration, prompt engineering, MCP, agent observability

Databases & APIs: Convex, Stripe API, RESTful services, webhook integration

Development Tools: GitHub, Cursor, Docker, cron, unit testing frameworks

EDUCATION

Gull Lake High School – High School Diploma – Richland, MI

PROJECTS

Cerberus — Hosted OAuth 2.1 Authorization Layer for Remote MCP Servers

- Building a hosted layer that handles OAuth 2.1 flows for Model Context Protocol servers, removing one of the harder pieces of remote MCP deployment.
- Stack: OAuth 2.1, MCP, Node.js, TypeScript

OpenClaw — Multi-Agent VPS System

- Production system running autonomous Claude Code agents on a Linux VPS with cron-scheduled tasks and inter-agent coordination. AGENTS.md-based prompt architecture defines agent boundaries.
- Stack: Claude SDK, Linux VPS (Contabo), cron, custom orchestration

Listing Stage AI — AI Virtual Staging for Real Estate

- Solo-built SaaS. AI-powered staging for empty real estate listings. First paying customer acquired; live product.
- Stack: Next.js, AI image generation API, Stripe

mybestweddingplan.com — Wedding Planning Workbook Product

- $39 paid product. Convex backend, Stripe webhook fulfillment, and a Python/openpyxl service that generates a personalized Excel workbook per customer. Driving organic search traffic.
- Stack: Convex, Stripe, Python/openpyxl, Next.js

Elevate — Bible Reading Tracker (React Native)

- Free app built for my church's youth group. Year-long reading plan with streak logic, leaderboards, push notifications, and an admin console for announcements.
- Stack: Expo / React Native, Convex, push notifications

spoordata — Apify Actor: Meta Ad Library Scraper

- Active-advertiser scraper for Meta's Ad Library, monetized on Apify's Pay-Per-Event model. Built around the "proven-buyer trigger feed" idea.
- Stack: Python, Apify SDK, Meta Ad Library
